

The Law of Polarities

The two poles in everything that is created, positive and negative, masculine and feminine, solar and lunar; the two currents that rise in the body; the magnetism of the two; and the third force that makes the two one, in his own words, from all fifty-two books

Samael Aun Weor · in his own words

Every word here is his. Nothing has been paraphrased, joined or improved. Each passage was cut out of the book it belongs to by reference, and each carries that book and the paragraph it came from (and, where he was speaking rather than writing, the name of the lecture with the place and the year the volume records for it), so anything on this page can be found again in the source.

He names it as a law: *"everything in Nature is based on the law of polarities"*. In a lecture he says it more simply: *"Everything has two sides: positive and negative"*. The first part is the law itself: the One that unfolds into two, the Father and the Mother, the fire and the water, the two columns of the temple.

The second part is man and woman. *"The sexual force has two poles: positive and negative."* The sexes were divided, each keeping one pole, and *"The two poles are necessary to create."*

The third part is the body, the longest in the book, because he returns to it more than to anything else: Ida and Pingala, the solar and lunar currents, where they rise and where they end, the breath through the two nostrils, and the meeting of the solar and lunar atoms. *"The fire and the water rise through two sympathetic chords"*.

The fourth part is magnetism, the planets and the metals of the alchemist. *"The fundamental law of every magical influence is based on polarity."*

Then the two made one. In the lecture on the three forces he teaches that *"the positive force joins the negative force, and the neutral force reconciles the two opposite forces"*, and the last section closes on the androgyne: *"Man and woman sexually united, form a perfect divine androgyne"*.

1 Everything is dual in life

He teaches that everything in life has two sides, positive and negative, and that light has its limit in darkness. He gives the law of antithesis with plain examples, day and night, birth and death, and shows that even darkness is bipolarized.

Everything has two sides: positive and negative, this is obvious. This esoteric sign, for example, illustrates it. But you see it here, reflected on the floor. Observe the shadow on the floor, what do you see? The devil, that is clear, and nevertheless, it is the sign of esotericism; but its shadow, obviously, has the face of the Devil. Everything is dual in life, there is nothing which is not dual.

Master: Well, we are speaking in conventional language, that is obvious, because if we go into academic questions, I will have to tell you that there is neither right side nor reverse; what there is, is a pure game of polarities.

So I am using a merely conventional language, because if we are going to start using it technically, academically, well we understand that there is neither right side nor reverse, but polarities according to the hermetic doctrine. Let us see, any other question? Yes, speak.

So in order to know if Atlantis existed, you would need to verify that information. First of all, studying where Atlantis was located. That it was in the Atlantic Ocean? Okay good! What physical evidence, what data is there, what are its legends, which traditions, etc.? In possession of all that data, we then need to verify it. How will we verify it? Through the technique of meditation. We will have to lie down in our bed –hopefully with our head to the north– our body completely relaxed, our eyes closed. In moments in which we feel predisposed to sleep, we concentrate definitively on Atlantis, combining imagination and will in vibrant harmony. Let us remember that the imagination is feminine; it is not superfluous to tell you that the will is masculine, and that in the combination of these two polarities is found the key to all power.

III The fire is the eternal masculine principle

He teaches that fire is the eternal masculine principle and water the universal feminine principle, the Father and Mother of the universe. He shows the universe, the Son, born when the masculine fertilizes the feminine in the chaos.

In the dawn of life, when the heart of the Solar System began to beat after the Great Pralaya, the fire of the Logos fertilized the chaotic matter so that life, in all its splendor, would spring forth. The fire is the eternal masculine principle. The water is the Christonic semen, the universal feminine principle.

IV Unity becomes the origin of Duality, or the Binary

He shows how the Father, the Unity, unfolds into the Divine Mother, who is his feminine aspect. He illustrates the One becoming two with the Simonian verses, the circle and the point, and the principles hidden in zero.

Unity becomes the origin of Duality, or the Binary: 1 + 1 =2; and finally, in that Unity is the fulfilling synthesis of the Ternary. The Unity, the 1, is the Divine Monad, the First Logos, the Father who is in secret. Each one of us has his own individual Monad. Madame Blavatsky used to say that there are as many Fathers in heaven as there are men on Earth. The Father, in turn, or of himself unfolds into the Divine Mother. So it is that He and She are Brahma because She becomes the feminine aspect of Him. We see then how Unity is the root of the Binary, given that the latter could not exist without the Unity. If the Monad had not existed the Divine Mother would not have existed. The Monad is the root of Duality. There are as many Mothers in heaven as there are men upon the Earth. Each one of us has his internal God, or his own particular celestial Father and Mother. In explaining this, it is better understood why Unity is the fulfilling synthesis of the Ternary and how and why it is produced. When Jesus prayed, he prayed to the Father who is in secret, and he left us a prayer which is the "Our Father". This prayer is completely magical. It takes a couple of hours to pray the "Our Father" well, because each petition which is made to the Father is totally magical. The mistake that people make is to pray it in a mechanical manner, and this has no effect. The prayer must be broken down, analysed; and in order to do this one must relax the body so that not a muscle is tense, and then to concentrate, combining prayer with meditation.

V The dualism of the two columns of the temple

He reads the paired principles in the old symbols: the columns Jakin and Boaz, the letters Iod and He, Isis and Osiris, Shiva and Shakti. He adds the bull and the two cows of India and the two sphinxes of the Chariot.

Then came the great flood and all perished; they took refuge in caves and these collapsed (this is a reference to the submersion of Atlantis). Each one of us has his Father and his Mother who are very sacred. In the Father and in Mother Kundalini we see the two columns Jakin and Boaz; it is they, which support the Temple.

TAROT AND KABALAH, 1978

The Hebrew letter Beth expresses the dualism of the two columns of the temple. Jakin is the right-hand column, which is white, the man, the masculine principle and Boaz the black left-hand column, the woman, the feminine principle. Between the two columns 'J' and 'B' is the Great Arcanum. It is precisely this which many masonic brothers do not understand. The Cubical Stone in its crude state is located between the two columns, and once worked it becomes the Cubical Stone of Jesod; this is none other than Sex, the sephiroth Jesod. One must know the Arcanum, the Maithuna, which is represented by the Chisel of Intelligence and the Mallet of Will.

TAROT AND KABALAH, 1978

You must have valour and raise the veil of Isis, our Gnostic motto is Thelema (willpower). The number 1, the Father who is in Secret, is the Eternal Masculine Principle, in himself Brahma; who has no form, is impersonal, ineffable. We may symbolise him with the Sun. The number 2, the Divine Mother, is the Eternal Feminine Principle which is symbolised by the Moon. Brahma has no form but is, in Himself, the governor of the universe, is Ishvara, the Eternal Masculine Principle, the Universal Principle of Life.

Iod He Vau He reduces to SSSSSSSSSSSSSSSSSSSSS. These four letters have within them, immense priestly power. They must be pronounced like the howling of a cyclone in the mountains, or imitating the wind. They are spoken softly when one wants to heal one who is ill, or to invoke a Deity. They serve also for meditation. Within these four letters are represented the two principles, masculine and feminine of the Macrocosmos and the microcosmos; the Staff – masculine principle, and the Goblet – feminine principle. In these four letters is the principle of the Eternal which must not be pronounced in vain. The number "2" is essential. The Mystery Temples never lack "2" altars. One can not enter into the Temple without passing two columns where there are two guardians.

What would there be of the Great Life if the number "2" did not exist? The Matripadma receives the masculine Fohat ray. The Holy Spirit, husband of the Divine Mother fecundates it, and the universe comes into being. What would there be of life without the other principle? Before the dawn of the Mahamanvantara, the Cosmic Day, nothing existed, the Gods lived in that which is nameless, without form, without sound, without silence, and without hearing to perceive it.

These are the Mysteries o Isis, the Mysteries of the Bull Apis. When the Rune IS was studied in the old Egypt of the Pharaohs, its two Masculine-Feminine aspects were studied because the sacred word ISIS is broken up into two syllables; the first syllable is masculine and the second is feminine.

Esoteric Treatise of Hermetic Astrology, 1967

In the profound night of all ages, there, in the sunny country of Kern, the Rune IS was studied within the concealed Egyptian Temples. Thought was always on

the bipolarity of man-woman, masculine-feminine. It is clear that ISIS is the outcome of this thought, which is the sacred name of the Eternal Mother Space.

In Phoenicia, Hercules and Dagon loved each other intensely; as did Pluto and Persephone in Attica, but as Doctor Krumm Heller says, also between them the phallus and uterus are clearly spoken of; "this is the lingam-yoni of the Greek Mysteries." The great priests of Egypt, the ancient inheritors of the archaic wisdom, which the Atlanteans cultivated, represented the Great Ibis God Thoth with the virile member in a state of erection. Krumm Heller recounts that on that erect phallus of the Ibis Thoth a phrase was written which said, "Giver of reason." Next to the inscription a lotus flower shone gloriously.

14 PASSAGES

1 The male and female of the elements of nature

He shows the masculine and the feminine at work in matter: the positive nucleus and negative electrons, metal and non-metal, the spermatozoon and the ovum. He closes with the glands of the body, which work in masculine and feminine pairs.

The atom consists of a nucleus, or radiant sun, which has a positive electrical charge, and around which infinitesimal planetary electrons, negatively charged and dancing happily, revolve. The atomic nucleus and the electron are similar in all substances. The elements differ only in the number of electrons governed by the nucleus and by the corresponding variation of its charge.

THE BUDDHA'S NECKLACE, 1967

The atom is in itself a miniature universe. All of the mechanical processes that are performed within the deepness of the atom are also performed within our Solar System. Atomic investigations have verified that in the exterior regions of the atom there exists a cloud of electrons with an authentic negative electric charge, which when dissociated from the atoms agglomerate in dense floods in order to form all of the electric currents. The atom has been abundantly investigated and its marvels are astonishing. The nucleus positively charged is the vital center of this small spherical world. As the planets gravitate around the sun, likewise the electrons gravitate around that mysterious nucleus. Without a doubt the atomic nucleus possesses a considerable electric charge which the nucleus utilizes in order to retain under its domain the whole cortege of peripheral electrons, yet at a respectable distance.

THE SOLAR BODIES, 1968

Here we have sex ... the male and female of the elements of nature uniting sexually. The positive metal is irresistibly drawn to combine sexually with the negative non-metal in exact proportion to its opposite. This is an extraordinary Platonic parallel to the search by twin souls for their complementary half, after being separated at the dawn of creation. The active element in the Christ-Sun is an infinite quantity of hydrogen, whose atom possesses only one electron

revolving around its nucleus. The hydrogen atom is on the border between matter in a molecular state and matter in an electronic state. The next increasingly subtle state of hydrogen corresponds to free electrons, light, magnetic waves, and the spiritual state.

The Buddha's Necklace, 1967

Gnostics talk about the Third Logos. Science must know that the Third Logos is that primary intelligence. The Third Logos is not an individual. The Third Logos of the Gnostics is the primary intelligence of Nature. The creative energy of the Third Logos is that primary intelligence of Nature that unites the spermatozoon with the ovum. The creative energy of the Third Logos bipolarizes itself into positive and negative. The spermatozoon is the exponent of the positive forces of the Third Logos. The ovum is the exponent of the negative forces of the Third Logos. Both poles of the energies unite in order to create. The Law is the Law.

The surface and the medulla of the suprarenal always correspond to the masculine and feminine counterparts, which lead to conflict or evasion. This union of masculine and feminine sexual elements in every gland of the human body is wisely symbolized in the images of Tibetan Tantrism where each god is accompanied by a goddess or feminine Shakti.

11 The human being retained one pole of his sexual energy

He describes the first humanity as hermaphrodite, with the two poles of its sexual energy used to create, and the Elohim who polarize themselves at will. He then traces the division into opposite sexes and the promise that the human being will again be a divine hermaphrodite.

> *The Bible, in Genesis, tells us the following: "So God created man in his own image, in the image of God he created them; male and female he created them." (Genesis 1:27)*

That is to say God created the hermaphroditic man; male and female He created, in the image and likeness of God, because God is hermaphroditic. In the internal worlds we verify this great reality when we contemplate the solemn majesty of the Sons of the Fire, Angels, Archangels, Thrones, Virtues, Powers, etc. Those ineffable beings are active members of the Great Order of Melchizedek.

In that epoch when someone was born, a ritual was performed. Human beings could increase or diminish to the size of the atom. When a Master wanted to speak in a gentle manner he would put his feminine principle to the fore. When he wanted to show his firnmess he would put forward his masculine principle. This is how the Elohim are. The Latin tradition tells of how Aeneas went to the Sanctuary of Apollo (the Aeneid book IV) and spoke with the oracle who told him what awaited him. Aeneas requested to see his dead father, sought entry to the Inferno. The terrible Sibyl, custodian of the woods of Hecate Proserpina (third aspect of the Divine Mother), the woods of Avernus, replied: "The descent to Avernus is easy, the return to Earth is the difficult thing. Few are they who have achieved it." She asked him to obtain a bough sacred to Proserpina, the Divine Mother in her infernal aspect, whose leaves and branches were of gold. Aeneas made a sacrifice of some black sheep, then saw "two doves" in flight. In them, the hero recognised the birds of his Divine Mother (a symbol of the Holy Spirit). This message he wisely interpreted. The birds led him to the forest of Proserpina, to the branch which would enable him to enter the Inferno. Aeneas sacrificed four black cows, and the Sibyl led him through Avernus to his dead father.

The Perfect Matrimony, *1966*

In the Genesis of creation we have Sexual Alchemy. The Fire fecundated the cold waters of chaos. The masculine principle Alfadir fecundated the feminine principle Nifiheim, dominated by Surt (the Darkness), to bring forth life. That is how Ymir is born, the father of the giants, the Internal God of every man, the Master. He is nourished with the Materia Prima of the Great Work. This substance is the milk of the cow Audumla; the sacred white cow of India. In the Genesis of Moses the four rivers of Eden are mentioned, the four rivers of milk. These four are the flaming Fire, the pure Water of Life, the impetuous Air and the perfumed elemental Earth of the sages (the four tattvas). In every alchemical operation the four elements come into activity. These cannot be absent from the Sexual Alchemy of creation.

III The two poles are necessary to create

He teaches that no single man or woman can create, because the two poles are necessary, and he answers those who say one person already carries both. He warns that husband and wife form a complete polarity, while adultery forms a double polarity that is absolutely negative.

No human being is born of theory. Not even a simple microbe can be born of theories. No one is born through the nostrils, nor through the mouth. Every living being is born of sex. "As above so below". If man is born of sex here in the physical world, it is logical that above, in the internal worlds, the process is analogous. Law is law and the law is fulfilled. The Christ Astral is born as the body of flesh and blood is born. That is sexual. Only with Sexual Magic between husband and wives can one give birth to that marvelous body. We can say the same of the Mental and the Causal. We need to engender those internal bodies and that is only possible with sexual contact because, as above so below and, as below so above. No celibate can marry his feminine physical impulse with the masculine one of his internal Soul because no celibate can incarnate his Soul. To incarnate the Soul we must engender the internal bodies, and only through the sexual union of man and woman can they be engendered. No single man or any single woman can engender or conceive. The two poles are necessary to create. That is life.

THE PERFECT MATRIMONY, 1966

IV The sexual force has two poles

He teaches that the sexual force and the superastral light each have a positive and a negative pole, the serpent of bronze and the tempting serpent of Eden. He shows the angel with both poles flowing upward and the ordinary human being with one pole up and one pole down.

The sexual force has two poles: positive and negative. The positive is the serpent of bronze, which was healing the Israelites in the wilderness. The negative is the tempting serpent of Eden.

THE REVOLUTION OF BEELZEBUB, 1950

This Super Astral Light is the first light of Creation. It is the primordial Elohim. The Super Astral Light has two poles: one positive and the other negative. The positive pole is the Bronze Serpent (Kundalini) that healed the Israelites in the wilderness and the negative pole is the tempting serpent of Eden (Kundartiguador).

The great wheel of the law rotates three times for each denominational religion. Each of the three turns of the wheel has its vehicle of expression. There are three vehicles: the Small Vehicle, the Great Vehicle, and the Tantric Vehicle. The Small Vehicle is exoteric or public. The Great Vehicle is divided into two circles, the secret and the public. The third vehicle is absolutely Tantric. Here we find the Tantric maxim of Christ who says: "many are called but few are chosen."

V The two poles of the Dionysian wave

He shows that the Ninth Sphere, doubled in Arcanum 18, gives sex in its two aspects, positive and negative. He then defines the positive and negative poles of the Dionysian wave and names the movements that live out each one.

In the middle section are two pyramids, one black and one white, symbolising the positive and the negative. Two dogs or wolves, one black and the other white, howl at the Moon. The white, symbolising friendship, is positive whilst the black is negative and symbolises the psycho logical "I". They represent the terrible struggle between the tenebrous forces. The Moon in essence represents sex. We have to work with the Moon to convert it into Sun. The dog also represents the sexual instinct; and it is due to this that the dog takes us to the very doors of the Absolute.

TAROT AND KABALAH, 1978

We are all sons of sex, and for this reason in the Divine Comedy we see the condemned with water up to their generative organs and weeping with tears which congeal in their eyes. This is because it is a vale of tears and afflictions. That the waters reach their generative organs is due to the fact that they are spermatic waters; we are all born and die weeping. If we add 9 + 9 it equals 18. The "9" is contained twice in Arcanum 18. Between the two 9's there is a balance; one 9 is the positive aspect and the other nine is the negative aspect. The 18 is, however, essentially nega tive, disastrous; is the secret enemies of the Arcanum of Twilight. In the work in the Ninth Sphere one has to struggle a lot because one has to learn to sublimate the sexual energy; this is the key or solution to all empires.

TAROT AND KABALAH, 1978

In Arcanum 18 the Ninth Sphere is repeated twice. We already know that the number 1 is positive, and that the number 2 is negative. In the same manner if we repeat the Ninth Sphere once, and once again, we will have the two aspects of sex; positive and negative. Now you will understand why Arcanum 18 is light

and darkness, white magic and black magic. In Arcanum 18 we find the secret enemies of Initiation.

Tarot and Kabalah, 1978

❧

We are now going to study the eighteenth Arcanum of the Kabbalah. This is the Arcanum of the twilight. It is necessary that our Gnostic disciples reflect deeply on the esoteric content of this Arcanum. We have been strongly criticized because we do not continue on with the same old already well-known Hebraic tradition. Certainly we do not want to stick to the same old monotony. We are interested in that which is called comprehension. We want our students to comprehend each Arcanum and develop it in themselves. We want our disciples to discover each Arcanum, first within themselves and then in all of Nature. Arcanum 18 is light and shadow, white magic and black magic. On the 18 card appear a dog and a wolf howling at the Moon. We also see two pyramids on this card, one white and the other black. The symbol of the crab is also present in this Arcanum. In Arcanum 18 the number nine is contained twofold; 9 + 9 = 18. In this Arcanum the Ninth Sphere is repeated twice. We already know that the number 1 is positive and that the number is 2 negative. So if we repeat the Ninth Sphere once, and then twice, we will have sex in its two aspects: positive and negative.

In a delicate way I want to refer clearly and without hesitation to the "Universal International Christian Gnostic Movement" and also to the obverse of the Dionysian medal, known by the sadly famous name of the "Hippie Movement".

The Three Mountains, 1972

Unquestionably, these two psychological antipodes are "per se" an unmistakable living demonstration of the pair of opposite poles of the tremendous Dionysian vibration. Having arrived judiciously at this part of the present chapter, the need for a didactic confrontation becomes inevitable.

The Three Mountains, 1972

The hippies had a presentiment of all this when they rebelled against Mammon; however, they took the wrong road, and did not know how to synchronize with the positive pole of Dionysus.

The Three Mountains, 1972

VI The sexual cycle is governed by the planet Uranus

He teaches that the north and south poles of Uranus take turns facing the Sun in a sexual cycle of eighty-four years. He shows masculine and feminine periods of forty-two years alternating in history and in each human life.

The sexual cycle is governed by the planet Uranus and lasts for eighty-four years. The north and south poles of Uranus take turns pointing towards the sun. These poles are the determining factors in the eighty-four year cycle of the human species.

THE BUDDHA'S NECKLACE, 1967

If the positive or masculine pole of Uranus points towards the sun, the masculine sexual impulse predominates on the earth. If the negative or feminine pole points towards the sun, then the feminine sexual impulse predominates. The masculine sex predominates for forty-two years; the feminine sex reigns supreme for forty-two years.

THE BUDDHA'S NECKLACE, 1967

The time of piracy, of Isabel, of masculine unfolding, of knightly adventures: these clearly represent the masculine sexual cycle. This year, 1965, in which women undress, predominate, order, and accuse, shows clearly the feminine sexual cycle.

THE BUDDHA'S NECKLACE, 1967

That planet of our solar system is very interesting. We have been told that the North and South Pole of Uranus alternately point towards the Sun.

YES, THERE IS A HELL, A DEVIL AND KARMA, 1973

When the positive pole of such a planet is oriented towards the king star, the masculine force is imposed on the face of the Earth.

YES, THERE IS A HELL, A DEVIL AND KARMA, 1973

When the negative pole of that world is oriented towards the shining Sun, then the feminine force rules on our afflicted world.

Yes, There Is a Hell, a Devil and Karma, 1973

The alternating stimuli of the two poles of Uranus govern all the sexual history of human evolution.

The Perfect Matrimony, 1966

Each cycle or magnetic period of Uranus is of 42 years; in this manner, men and women alternate their command here on Earth, in cycles or periods of 42 years.

Yes, There Is a Hell, a Devil and Karma, 1973

After each masculine cycle there then follows a feminine cycle and vice-versa; everything depends on the polarization of Uranus and on the type of energy that comes from that planet to Earth.

Yes, There Is a Hell, a Devil and Karma, 1973

Uranus is eight times the size of Venus; it governs the masculine and feminine phases of sex; it has a sexual cycle of 84 years. This cycle is divided into two 42 year periods; one masculine and positive, the other feminine and negative. Uranus is oriented in such a way that it always has one of its two poles pointed towards the Sun.

Esoteric Course of Kabbalah

For 42 years Uranus has its positive pole pointing towards the Sun, and for the other 42 years it has its negative pole presented to the Sun. We will now comprehend where the alternating stimulus of the sexes comes from—the marvelous biorhythm of 84 years. The wheel of the centuries turns in periods of forty-two years. During one half of the cycle the masculine sex asserts itself and during the other half the female sex asserts itself. The sexual cycle of Uranus is in

accordance with the average human life span. This means that when we have reached middle age the antithesis of the sexual cycle during which we were born vibrates within us. At that time a feeling of sexual stimulation occurs. We will now comprehend why 40 year old men and women are truly ripe and mature to work in the Great Work and why sexual feelings are more vigorous at that age.

Esoteric Course of Kabbalah

❧

Uranus has a sexual cycle of eighty-four years. Uranus is the only planet that directs its poles towards the Sun. The two poles of Uranus correspond to the two aspects: masculine-feminine. These two phases alternate in equal periods of forty-two years. The alternating stimuli of the two poles of Uranus govern all the sexual history of human evolution. Periods in which women undress to display their bodies alternate with periods in which men adorn themselves. Periods of female predominance alternate with periods of intrepid gentlemen. This is the history of the centuries.

❧

When the human being reaches the age of maturity, he is then stimulated by the antithetical cycle, opposed to that which ruled during his infancy and youth. Then we are really mature. We feel sexually stimulated by the opposite sex. In fact mature age is marvelous for the work of sexual regeneration. Sexual feelings are richer and more mature at forty than at thirty years of age.

Part Three – Ida and Pingala

1 The caduceus of Mercury has the form of an eight

He shows the two ganglionic cords entwined around the spine as the caduceus of Mercury, the Holy Eight and the sign of the infinite. He names them the two witnesses of the Apocalypse, the two olive trees and the two candlesticks, known in the East as Ida and Pingala.

The Hindus gave the name 'Ida and Pingala' to the spermatic canals through which the sexual energy internally rises towards the head. These are nervous cords, which are related with the Vagus and Sympathetic systems. These cords are entwined along the spinal column in the symbolic shape represented by the Caduceus of Mercury.

THE REVOLUTION OF BEELZEBUB, 1950

The caduceus of Mercury has the form of an eight. Thus, the caduceus is also the sign of the infinite. This caduceus is the dorsal spine with its two sympathetic chords, Ida and Pingala.

The sun and the moon do not need to shine upon the heavenly Jerusalem because the immaculate clarity of the ETERNAL ONE illuminates it and the Lamb is its light. Ida and Pingala entwined around the Dorsal Spine are indeed the Perfect Eight. Joyful be the one who comprehends the Profound Mysteries of the Holy Eight.

❧

If we examine the vertebral column we will see the Holy Eight, and there, the two ganglionic cords which are entwined about the spinal cord, which are represented by the Caduceus of Mercury or Hermes. These are: Ida and Pingala, the Two Witnesses, the Two Olives, the Two Candlesticks which are before the throne of the God of the Earth and which ascend to the brain to the height of the pineal gland, thence to the pituitary between the eyebrows finally reaching the heart by means of an extremely fine thread called Amrita-Nadi.

Now then, after this digression, let us return to the initial point. The Holy Eight symbolizes the Caduceus of Mercury and represents the two ganglionic cords that, esoterically, are coiled around the spinal medulla. They are Ida and Pingala, the Two Witnesses, the Two Olive Trees, the Two Candlesticks that are before the throne of the God of the Earth.

The Perfect Matrimony, *1966*

The Ninth Sphere is sex. And the two witnesses are rooted in sex. These two witnesses, Ida and Pingala, are the fine ganglionic channels through which the solar and lunar atoms of our seminal system ascend to the Chalice. That Chalice is the brain.

The Two Witnesses are a pair of sympathetic channels, semi-etheric, semi-physical, which are entwined about the spinal column forming the Caduceus of Mercury, the Holy Eight, the sign of the Infinite. They are known in the East as Ida and Pingala.

❧

The ascension of creative energies of the Third Logos is realized through the ganglionic cords, known in the Orient by the names of Ida and Pingala. These are the two Witnesses of the Apocalypse. Those two cords twine themselves on the spinal medulla and form the Caduceus of Mercury. When the solar and lunar atoms, which ascend through the two ganglionic cords, manage to make contact in the coccygeal bone near the Triveni, the Sacred Fire of the Kundalini then awakens. The ascension of the Kundalini takes place in the central channel of the spinal medulla. The Kundalini develops, evolves and progresses within the Aura of the Solar Logos. The Kundalini ascends slowly in accordance with the merits of the heart. The fires of the heart control the ascension of the Kundalini. That Kundalini Fire transforms itself into the Bird of Minerva! the important thing, for this to happen, is to know the Key !

Logos, Mantram, Theurgy, *1959*

❧

That matter of the "two witnesses" appears to me also very interesting. Those "two witnesses" are the nervous cordons called by the Hindustanis, "Idá" and "Pingalá." These two cordons are related to the "ganglions" and along them ascend the solar and lunar atoms of our seminal system.

The unique difference of the female with the male in relation to the Kundalini is that the two ganglionic canals called Ida and Pingala are inverted. These two ganglionic canals resound with the note FA of Nature. The Akãsa ascends like the flaming Fire through the medullar channel, and its two poles of energy flow through Ida and Pingala. From the medullar channel and its two channels, which are entwined like Serpents around the spinal column, a circulation begins which, de parting from the central duct, is then distributed throughout the whole organism. Ida and Pingala depart from the sexual organs. Ida is to the left of the medullar channel and Pingala to the right. In the woman this order is reversed. The channels terminate in the medulla oblongata. This pair of cords is semi-etheric, semi-physical, and corresponds to the superior dimensions of space.

Through them rises the sacred fire of the Holy Spirit to the pituitary.

A PRACTICE

Take that comfortable position that we formerly advised you about to perform your meditation. After having placed your mind in a blank state, concentrate on the sacred fire of the Holy Spirit and see with the eyes of your soul that this fire arises from your prostatic (uterine) chakra towards your solar plexus, and at the same time through Ida and Pingala which are located on either side of your spinal medulla. This exercise must endure for at least thirty minutes daily and must be performed at the same hour. If you want success with these studies, you must neither drink alcohol, nor smoke, nor eat too much red meat. Do not worry; cultivate the habit of being happy.

III Everything in Nature is based on the law of polarities

He explains why lunar Ida has its root in the right testicle and solar Pingala in the left: everything in Nature is based on the law of polarities. He adds that Ida is cold and pale, Pingala hot and red, and gives Blavatsky on the sharp and flat of the note FA.

Each has its own particular path, then, if this were not so, they would irradiate the whole body." In that ancient elemental Egypt, which grew and matured under the protective wings of the elemental Sphinx of nature, the ceremony of initiation was something terribly divine. When the Venerable Mas ter wielded the sword in the act of admission, the channels of Ida and Pingala (the two Witnesses) and the channel of Sushumnã, along with the forces which circulated through them, received a tremendous stimulus. In the First Degree this stimulus only affected the feminine Lunar current of Ida; in the

Second Degree, Pingala, the masculine current; and in the third, the igneous current of Kundalini that flows ardently through the medullar channel of Sushumnã received the stimulus. With this Third Degree the Kundalini remained awakened. We want to clarify that these three stimulii were related with the work of Sexual Magic that the Initiate realised with the vestal of the temple. Such stimulus would be useless if the candidate were a fornicator. This is for people who are practising Sexual Magic intensely.

The Perfect Matrimony, *1966*

Ida rises from the base of the spinal column to the left of Sushumnã, and Pingala to the right. These positions are reversed in the woman. The cords end in the medulla oblongata. All this is symbolised by the Caduceus of Mercury, with its two spread wings. The two wings of the Caduceus of Mercury signify the power to travel in the astral body, the power to travel in the mental body, the power to travel in the causal, conscious and spiritual vehicles. The Fire gives those who follow the Path of the Razor's Edge the power to leave the physical body at will. Kundalini has the power of awaken ing the consciousness of the human being. Within the Fire we remain completely awakened in the superior worlds. All those who have awakened in the superior worlds, live absolutely consciously outside the physical body during the hours of sleep. Whoever awak ens the consciousness can never again dream. They become in fact, and rightfully, absolutely conscious citizens of the superior worlds. They work with the White Lodge while their physical body sleeps. They are the collaborators of the Great White Universal Fraternity. We clarify; Ida and Pingala are not physical. A physician could not find them with a scalpel. Ida and Pingala are semi-etheric, semi-physical.

IV The sexual energies are bipolarized into positive and negative

He teaches that unspilled semen turns to vapours and then to energies that bipolarize into solar and lunar currents. He follows these currents up the two cords to the chalice of the brain, where the two witnesses gain their power.

That reed is our spinal column. Along that reed there is a canal and through it ascends the fire of the holy Spirit from our sexual organs. That Pentecostal fire resembles an ardent and terribly divine serpent. What is important is to know how to love the woman. What is important is to withdraw from the sexual act without spilling the semen. This is how the fire of the Holy Spirit is awakened. This is how the ardent serpent of our reproductive organs rises. There is nothing more sublime than love, the kiss, and the sexual act. When we do not spill the semen, the latter is then transmuted into seminal vapors. The seminal vapors are transmuted into energies. The sexual energies are bipolarized into positive and negative; the positive ones are solar and the negative ones are lunar.

In the sacred patios of the temples, men and women remained entire months caressing and loving each other and, even in sexual connection; however, they knew how to restrain the animal ego in order to avoid seminal ejaculation. The semen, already totally converted into energies, rises through the two sympathetic channels which are the Two Witnesses of Apocalypse, the two Olives of the Temple, the two Candelabra which are before the God of the Earth, the two Serpents which are entwined on the rod of the Caduceus of Mercury. The secret key is the Great Arcanum. This Arcanum is sexual. There must be sexual connection. The key is found in the union of the phallus with the uterus, what is important is for the couple to retreat before consummating the sexual act, before the spasm, before the physiological orgasm to avoid the ejaculation of semen; one must not ejaculate the semen inside or outside of the womb. The refrained desire transmutes the seminal fluid into rarefied seminal vapors, which at the same time convert themselves into solar and lunar energies, positive and negative. Those electro-magnetic energies ascend through two fine ganglionic channels that wrap around the spinal cord.

Those energies rise up to the chalice, that chalice is the brain. That is how the brain is semenized. That is how the semen is cerebrated.

Mountain of Juratena

Refrained passion transmutes the semen into fine vapors. The seminal vapors transform into energies. The bipolarized sexual energies then ascend through the ganglionic channels to the brain. When the solar and lunar currents unite, the sacred fire of the Third Logos then awakens. The igneous flow of the Third Logos ascends through the central channel of the spinal cord.

v The fire and the water rise through two sympathetic chords

He teaches that the fire and the water of the Ninth Sphere rise through two sympathetic cords from the sexual organs to the brain. He then gives the full course of the two witnesses and the contact of opposite poles in the sexual union of initiates.

The fire and the water rise through two sympathetic chords which are entwined around the spinal medulla. In the East, these two witnesses are Ida and Pingala.

The Aquarian Message, 1960

The water and the fire of the Ninth Sphere rise through these two sympathetic canals (IDA and PINGALA) towards the chalice (the brain) when we work with the Arcanum A.Z.F.

The Aquarian Message, 1960

The Waters are transmuted into energy, and arise through Ida and Pingala, reaching the brain, forming the Caduceus of Mercury, the Holy Eight.

Tarot and Kabalah, 1978

Ida and Pingala are the channels through which the atoms of the fire and the water rise. The Spirit grasps the "cane of seven knots" and this cane is the spinal medulla. When the woman and the man know how to avoid the spasm and the ejaculation of the ens seminis, the Igneous Serpent of our magic powers then awakens. If you want to return to the Father who is in secret, you must first return to the womb of your Divine Mother Kundalini. You need to raise the Serpent of Life through your medullar canal; that is Alchemy. You have forgotten about your Divine Mother Kundalini. You need to adore the divine and blessed mother goddess of the world. You have been ungrateful towards your Cosmic Mother. She is the Virgin from all religious belief systems. She is Isis, Mary, Cybele, Adonia, Insoberta, etc. The stone of grace is encircled by nine delightful mountains. That stone is the sex. If you want to return to the

womb of your Divine Mother, you need to work with the Philosopher's Stone—Sex.

Esoteric Course of Kabbalah

The solar and lunar atoms of the seminal system ascend towards the brain through the two sympathetic canals. These two canals are two fine chords which rise from the testicles or ovaries up to the brain.

The Aquarian Message, 1960

The objective of sexual union between Initiates is to establish the contact of opposite poles in order to awaken the Kundalini.

Esoteric Course of Kabbalah

In the East, these two canals are known as IDA and PINGALA. These are the two witnesses.

The Aquarian Message, 1960

The igneous serpent of our magical powers awakens when the solar and lunar atoms make contact in the coccyx. Thus, this is how we convert ourselves into ardent flames. The key of fire is in the intersection of the vertical phallus with the horizontal cteis. However, you must be careful not to spill the wine of the Altar.

The Aquarian Message, 1960

The two witnesses are a pair of semi-physical, semi-etheric sympathetic nerve cords that are entwined around the spinal cord, forming the Holy Eight, the Infinity Sign. In a man, the two witnesses emerge from the two testicles, right and left, and in a woman they emerge from the ovaries. The two witnesses are situated at either side of the spinal column. The two witnesses ascend alternating

from left to right until forming a marvelous knot in the space between the two eyebrows. Then they proceed to the nostrils. The two witnesses connect the sexual organs with the nostrils. The ganglionic cord that issues from right side is hot, solar; the ganglionic cord that issues from the left side is cold, lunar. This pair of nerve cords gracefully joins in the coccyx. When the solar atoms and lunar atoms of the seminal system come into contact in the Triveni, near the coccyx, the Kundalini awakens.

Esoteric Course of Kabbalah

❧

The objective of sexual union between Initiates is to establish the contact of opposite poles in order to awaken the Kundalini. With sexual contact, the mercury of the secret philosophy multiplies (the seminal liquor increases). When not ejaculated, the ens seminis is transmuted into seminal vapors.

Esoteric Course of Kabbalah

❧

In turn the seminal vapors are converted into energies that bipolarize into positives and negatives. The positives are the solar forces; the negatives are the lunar forces. The solar and lunar energies rise up through the pair of sympathetic nerve cords known as the two witnesses—Ida and Pingala. The medullar canal has an opening on the inside, which is closed in common, ordinary people. The seminal vapors uncover that orifice so that the Sacred Serpent can enter therein, inside of the medullar canal.

VI The right nasal cavity is related with Pingala

He relates the right nostril to Pingala and the solar atoms, and the left nostril to Ida and the lunar atoms. He gives Pranayama for purifying the channels, then states plainly that it cannot by itself awaken the Kundalini.

33. Pranayama (a practice that consists of making profound inhalations of air, and retaining the inhaled air as much as possible, and afterwards exhaling the air until emptying the lungs), also teaches about the poles of the energy: one masculine pole located in the brain (Cerebrospinal Nervous System) and the feminine pole in the heart (Grand Sympathetic Nervous System). Thus, as when we form two poles in the space through a magneto, we create new energies and

these forcedly are giving birth to a third pole; likewise, we affirm that the third pole is Devi-Kundalini, which, from the union of the solar and lunar atoms, is born within the Triveni, situated in the coccyx.

The Mysteries of Fire, 1955

Editor's note. In his later teaching the Master makes this plain: pranayama, mantras and chastity purify the channels and sublimate the sexual energy, and single people should practise them, but the Kundalini itself awakens only through the sexual work of the couple (Maithuna). See The Solar Bodies (1968), ch. 25, and Tarot and Kabbalah (1978), Arcanum 11.

A PRACTICE

We achieve the power to place the physical body in the Jinn state with Pranayama. It is very important to practice Pranayama before using these keys. It is interesting to know that the two witnesses, Ida and Pingala, in their final synthesis, are rooted in the right and left testicles of the male and in the ovaries of the female. Through this pair of nervous canals, the solar and lunar atoms of the seminal system rise until they reach the chalice (the brain). The nostrils and the sexual organs are connected through the two witnesses. This invites us to reflect. Pranayama, among other things, is truly a system of sexual transmutation for single people.

A PRACTICE

The canals of Ida and Pingala can and must be purified with Pranayama. The Sexual Energies can be sublimated with Pranayama.

The Solar Bodies, 1968

Nevertheless, one cannot awaken the Kundalini with Pranayama, because the Kundalini only enters into activity with the Sexual Contact of the Positive and Negative, Masculine and Feminine Polarities during the Sexual Act.

The Solar Bodies, 1968

We find many things on this planet; this is why, for the limit of all absurdities, there exist certain stubborn people who believe that because within every human being there exists two polarities one can (according to these stubborn people) awaken the Kundalini without the need of Maithuna. These dimwitted people should give unto women, as a gift, the formula to conceive children without the necessity of a sperm, without the necessity of sexual contact. These foolish people should give away to men the clue on how to engender children without the necessity of a woman's ovum.

VII A magnetic field exists in the root of the nose

He teaches that the solar and lunar atoms meet in a magnetic field at the root of the nose, joined to the coccyx by the two cords. He describes the Akasa passing through Sushumna and its two currents meeting there, and gives a breathing practice.

6. A magnetic field exists in the root of the nose where the solar and lunar atoms of our seminal system come into contact.

IGNEOUS ROSE, 1954

7. This contact is possible only by means of sexual magic, because the nasal cavities are intimately related with the church of the coccyx, by means of the two ganglionic cords of our spinal medulla.

IGNEOUS ROSE, 1954

A PRACTICE

8. The Yogis of India achieve this contact of solar and lunar atoms in the root of their nose and in their Muladhara chakra by means of Pranayama and chastity.

IGNEOUS ROSE, 1954

9. The Pure Akasa circulates through the Shushumna channel, and its two solar and lunar currents make contact in the magnetic field of the nose when we practice sexual magic intensely.

IGNEOUS ROSE, 1954

12. These solar and lunar channels must be totally pure so that the solar and lunar currents can circulate freely through its ganglionic cords, and in order for the Pure Akasa of the Shushumna channel to flow freely through the spinal column.

74. Thus, when this Akasic breath collides with the solar and lunar currents and with the christic atoms which form the Kundalini, the sacred fire then rises one more vertebra, one more canon in its ascension through the thirty-three canons until reaching Brahmarandra. 75. When the Akashic breath, reinforced by willpower, descends through our Brahmanic cord and finds atoms of fornication (satanic atoms collected from the infernos of the human being during the movements of the genital orgasmic contraction, which occurs in the seminal ejaculation) instead of Christic atoms, the collision of the Akasa with such satanic atoms would then awaken the Kundalini in a negative way (awakening the Kundartiguador). A satanic atom that resides in the Muladhara chakra would then enter into activity, and would control it causing it to descend from the

coccyx downwards towards the atomic infernos of the human being, forming the famous tail with which Satan is represented (the Kundartiguador).

VIII The solar atoms initiate us into the wisdom of the fire

He teaches that the sacred fire awakens when the solar and lunar atoms of the seminal system make contact in the Triveni, near the coccyx. He repeats this from book to book and ends with the mantram HIRAM.

All of the cosmic wisdom is within ourselves. The solar atoms initiate us into the wisdom of the fire. The lunar atoms initiate us into the very ancient Neptunian Amentine wisdom. The sacred fire awakens and we convert ourselves into Gods when these solar and lunar atoms make contact.

The Revolution of Beelzebub, 1950

Our Kundalini is also formed from solar and lunar atoms and from a synthesis of omniscient atoms. Hence, the wisdom of seven eternities is integrated within the serpent. The woman is the vestal of the temple, thus, the fire of the temple is lit by the vestal. In ancient times, the fire was guarded and lit by the vestals. This symbolizes that only the woman has the unique capability of lighting her husband's fire of Kundalini, which is the fire from our body or our temple. The temple of the very high living God is our body and the fire of this temple is the Kundalini, which our vestal spouse lights by means of the same sexual contact, or sexual magic, as taught in the book The Perfect Matrimony, or The Door Entering into Initiation, and as well within this current book.

Let us see, for example, the mysteries of sex, here given between the lines by different Masters. In Alchemy, the simple system related to sex is always given between the lines, that fine artifice which means the connection of lingam-yoni without ever spilling the Glass of Hermes Trismegistus. Well, then, having read that, what do we know? That through such a system, the sacred sperm is converted into energy, that the energy is bi-polarized, that it ascends through the cords of Ida and Pingala that are related to the spleen and the sympathetic nervous systems, we know all this; and that finally the solar and lunar atoms, near Triveni, make contact to awaken the third force, which the Orientals call Kundalini; that this third force ascends through the spine, etc.

It is obvious that the sperm, by transforming into energy, goes through many processes. That energy which ascends through the cords of Ida and Pingala is the second aspect of the sperm. Think of the first one, in the sexual secretions, think of that flexible, malleable liquid glass. The second one, in the result of its transmutation, that is, in the creative energy going up through the Ida and Pingala cords to the brain; that is the second aspect of the mercury. Think of the third aspect: in the positive and

negative pole of such mercury fused and mixed at the base of the spine, integrated with the Sacred and Solar Fire of the Kundalini, ascending through the spinal cord canal to open the seven seals of the Book of Revelation by Saint John. Therein lies the third aspect of the mercury. X The Anahat Sound is produced by the sexual energies in motion

He gives practices that work with the two currents: the mantrams for the Anahat sound, FARAON, and meditation on Ida and Pingala. Each closes with the breath held and the sexual energy imagined rising through the two cords to the brain.

The Sexual Energy is bipolarized into positive and negative. Through the right ganglionic cord, which twines itself on the spinal medulla, ascend the solar atoms from our seminal system. Through the left ganglionic cord, which twines itself on the same, ascend the lunar atoms from the same seminal system.

Logos, Mantram, Theurgy, 1959

A PRACTICE

To cause the Subtle Voice, the Sound of Anahat, to resound in the cerebrum use the Sexual power of the two witnesses known in the Orient by the names of Ida and Pingala. The Anahat Sound is produced by the sexual energies in motion. It is already known that all motion produces sound. If one tries to cause the "Solar and Lunar atoms" of the seminal system to vibrate, the Anahat Sound will be produced louder, more intense, and will enable one to consciously leave in the Astral Body.

A PRACTICE

Internal meditation accelerates the development of the Feathered Serpent, whose ascension liberates the Initiate from the wheel of births. However, it is necessary to help its ascension by meditating first on Ida and then on Pingala, (which are the currents of fire); the one on the left is negative, and the one on the right is positive. They ascend upward (on each side of the spinal medulla) up to the pituitary chakra. The ascension of these fires precedes the ascension of the sacred fire of Quetzalcoatl.

A PRACTICE

When inhaling, imagine the sexual forces rising, ascending from the sexual glands throughout the pair of sympathetic nervous cords, which are known in India by the names of Ida and Pingala.

Runic Magic, 1969

A PRACTICE

If he has to inhale again, he can do it, but he should try to hold his breath as much as is possible. In those moments, he must intensely refrain and imagine that his sexual energy ascends throughout the two canals, Ida and Pingala, towards his brain.

My Return to Tibet, 1969

A PRACTICE

In these instances, close the right and left nostrils by sealing them with the forefinger and thumb of the right hand. Try holding the breath in this way for as long as possible. Send the nervous current towards the sexual sphincters or escape valves with the aim of preventing spilling the Vessel of Hermes. Imagine that the seminal energy ascends through Ida and Pingala up to the brain.

The Mystery of the Golden Blossom, 1971

A PRACTICE

The alchemist will inhale the vital air, retain the breath, and in those moments direct the nervous current downward towards the prostate with the intention of closing the sphincters that exist between the seminal vesicles and the urethra. This effort to send these electronervous currents to the prostate must be similar to the exertions a woman makes during childbirth. In those moments of childbirth the woman struggles, and from her larynx emerges the letter "M". Krumm Heller states that Initiation commences with the letters "M" and "S". We want to be born in the internal worlds. We must also make the effort to use the letter "M"—it is about being born, and we must be born. Next, we inhale slowly, we wait for the breath to return naturally, and upon inhalation we mentally cause the creative energy to rise up through the two channels of Ida and Pingala to the Chalice (brain). We repeat this effort and continue…

Part Four – The Sun and the Moon

1 The fundamental law of every magical influence is based on polarity

He teaches that every magical influence rests on polarity, as the like poles of magnets repel and the electron and proton align. He shows magnetism passing between husband and wife in the sexual act, and ends with the instruction that they magnetize each other.

The fundamental law of every magical influence is based on polarity. 'All of us human beings, without exception, have certain amounts of electric and magnetic forces in ourselves. Therefore, similar to a magnet, we exert a force of attraction and a force of repulsion... This magnetic force is very powerful, especially among men and women who adore each other, and it is unquestionable that its action reaches very far."

PARSIFAL UNVEILED, 1970

Indeed, the atom of hydrogen consists of one electron and one proton, both describing authentic, real and magnificent orbits, therefore, harmoniously acting like two fine magnetic wires.

MY RETURN TO TIBET, 1969

Just as in contiguous magnets, the poles of the same name are mutually repelled, likewise, the most perfect alienation of these two particles occurs when its magnetic poles are found in opposite directions.

MY RETURN TO TIBET, 1969

This is why the atom acquires a determined force which allows it to liberate the electron, in such a way that its positive pole remains alienated with the positive pole of the proton. Once this liberation occurs, the atom preserves a slight reserve of energy.

MY RETURN TO TIBET, 1969

The scientists know very well through observation and experience that the intensive magnetic field which is formed in the galaxies, originates the radical split of the particles in accordance with their electrical charge. The plasma and anti-plasma are not only opposite, but moreover they are separated.

During the act of Sexual Magic, couples are charged with magnetism; they magnetize each other. The pelvis of the woman pours out feminine currents whilst the breasts give off masculine ones. In the man the feminine current is

He teaches that every planet has a positive and a negative ray, Anael and Lilith for Venus, Jehovah and Chavajoth for the Moon. He names the Sun and Moon the positive and negative poles of sound, man the Sun and woman the Moon.

All planets have two polarities in accordance with the Great Law. Elohim Gibor represents the positive ray of Mars. The double of this Elohim represents the negative ray of Mars. This double is called Andramelek. The perverse demon Andramelek is now reincarnated in China.

The Perfect Matrimony, *1966*

Anael represents the positive ray of Venus. Lilith represents the negative ray of Venus. The traditions of the great Kabbalists say that Adam had two wives: Lilith and Nahemah. Lilith is the mother of abortion, stoning, sexual degeneration, homosexuality, infanticide etc.

The Perfect Matrimony, *1966*

The unmanifested primordial sound, by means of its incessant evolutionary processes, is converted into energetic forms of dense stabilized matter. The primordial unmanifested sound is the subtle voice. The primordial sound contains within itself masculine-feminine sexual forces. These forces multiply and complicate as we descend into the difficult abyss of matter. The positive pole of sound is the marvelous force, which draws us towards the unmanifested Absolute where only happiness reigns. The negative pole of sound is the tenebrous force which attracts us towards this vale of bitter ness. The positive pole is Solar, Christic, divine. The negative pole is Lunar and is represented by the Moon. The shadow of the White Moon is Lilith. The origin of fornication is in Lilith. The origin of separate individuality is in Lilith. The origin of the "I" is the Black Moon. The Black Moon is Lilith.

The Perfect Matrimony, *1966*

The Moon is of a feminine nature. The Sun is of a masculine nature. When the solar and lunar atoms make contact with the coccygeal bone, close to the Triveni, then the Spiritual fires awaken and the development, evolution and progress of the Kundalini begins. The nine women constitute the Ninth Sphere (sex). The men represent the three aspects of the Logos or the human being in his three aspects of Body, Soul and Spirit. Each of the three men of the triangle has in his right hand a reed. This reed represents the spinal medulla. Let us remember that the Holy Jerusalem is measured with a reed. The three men of the triangle will charge themselves with the strength of the chain. The Christic energy rises through the medullar canal, vivif,ring fires and awakening the chaksas of the astral body. The Sanctuary must be carefully arranged in accordance with the laws of occultism. The Aztecs had a well of pure water inside the Sanctuary so that it would attract lunar forces. There was never absent from this well the lunar animal that is known as the frog. The frog and the water attract lunar forces. The liturgical system to attract solar forces is also very easy and simple. They would paint on the ground a circle of eight palms in diameter. In the center of the circle they would light the fire. Any Gnostic student today can arrange his Sanctuary in a similar manner. This is easy.

III The two Mercuries, masculine and feminine, engender the Sacred Fire

He shows the alchemical work carried out with gold and silver, the Sun and the Moon, which are the sexual forces of man and woman. He gives the Sun as Father and the Moon as Mother of the Stone, and the two Mercuries that engender the fire.

The gold and the silver, the sun and the moon are the sexual forces of man and woman. The Alchemist woman should never reach the physiological spasm either. Thus, this is how she will transmute her sexual energies and can awaken her serpent.

Part Five – The neutral force

22 PASSAGES

1 The neutral force reconciles the two opposite forces

He teaches that the positive and negative forces alone produce nothing, and that the neutral force reconciles them in every creation. He gives man, woman and child as the example, and the Elohim in the temples polarized as priest, priestess and neutral choir.

Unquestionably, the Great Breath, that is, the active Okidanokh – omnipresent, omni-penetrating, omniscient– emanated at the dawn of this creation from the Sacred Absolute Sun, and it must unfold itself into three fundamental ingredients to be able to create: the first one, the positive force; the second one, the negative force; the third one, the neutral force. If those three cosmic forces –positive, negative and neutral– did not coincide in a given point in the universe, any type of creation would be impossible. That is why these three forces –positive, negative and neutral– coincide in a given point, and there, where they meet, creation arises.

The Fifth Gospel ·The Balance of the Energetic Centers ·*Conference given to Gnostic students*

Let us take man as an example. He alone could not create a child, and a woman alone could not conceive either. It is necessary that man joins his wife sexually to be able to create. The positive pole –man– joins the negative pole – woman–, and the neutral force reconciles them both; then the creation of a child is realized.

The Fifth Gospel ·The Balance of the Energetic Centers ·*Conference given to Gnostic students*

Just as it happens down here, it happens in the infinite cosmos: the positive force joins the negative force, and the neutral force reconciles the two opposite forces in order to materialize a certain creation.

The Fifth Gospel ·The Balance of the Energetic Centers ·*Conference given to Gnostic students*

In very ancient psychology, the positive force was called “Holy Affirmation”, the negative force was named “Holy Negation” and the neutral force “Holy Reconciliation”. These Three Forces are the causa causarum of all creation.

Undoubtedly, the creation of a child would not be possible without the combination of the Three Forces of nature.

Let us now move on to Devi Kundalini. Obviously, the Igneous Serpent of our magic powers could never develop and unfold with a single force, the masculine or the feminine. The Elohim are male and female. The man and woman, sexually united during the supreme ecstasy of love, are really a terribly divine Elohim.

THE PERFECT MATRIMONY, *1966*

Every negative attitude of the mind impels the sexual energy, and compels it to circulate through channels and systems appropriate for the mental and volitive energies, or any other types of energy less powerful than the sexual energy. The result is disastrous because those types of channels and systems, being unable to withstand the tremendous voltage of the extremely powerful energy of sex, overheat and burn out, as does a cable that is too thin and fine when a high tension electric current passes through it. When man and woman unite sexually in the Perfect Matrimony they are in those moments of delight, true ineffable Gods. Man and woman sexually united, form a perfect divine androgyne, a male-female Elohim, a terribly divine Divinity the two halves, separated from the dawn of life, unite for an instant to create. That is ineffable.., sublime..; this is a thing of paradise...

THE PERFECT MATRIMONY, *1966*

We must not forget that when the man and the woman are united during the chemical coitus they are truly, one divine, omnipotent and terrific Androgynous.

Sex is the fifth power of the human being. Sex can liberate or enslave man. No one can attain integrity no one can profoundly realize himself without the sexual force. No celibate can achieve total realization. Sex is the power of the

Soul. The integral human being is achieved with the absolute fusion of the masculine and feminine poles of the Soul. The sexual force develops, evolves and progresses on seven levels (The seven levels of the Soul). In the physical world sex is a blind force of mutual attraction. In astral, sexual attraction is based on the affinity of types according to their polarities and essences. In the mental world sexual attraction takes place according to the laws of polarity and mental affinity. On the causal plane sexual attraction is realized on the basis of Conscious Will. It is precisely on this plane of natural causes where the complete union of the Soul is consciously realized, In fact, no one can attain the complete glory of the Perfect Matrimony without having reached this fourth state of human integration. We need to profoundly comprehend the whole sexual problem. We need to be integral. We need to transcend the mechanics of sex. We need to know how to procreate children of wisdom. At the supreme instant of conception, the human essences are completely open to all kinds of influences. The state of purity of the parents and their force of will to not spill the Cup of Hermes is all that can protect them from the danger that the spermatozoon and the ovum may be infiltrated by the subhuman substances of the bestial egos, which wish to reincarnate.

Those authors who consider this to be evolution, the return to divine hermaphrodism etc., are mistaken. The authentic hermaphrodite is not of intermediate sex. The hermaphrodite of the submerged continent of Lemuria was complete, having both sexes totally developed and evolved. They were not infrasexuals. They were not of intermediate sex. Today it is only possible to find

the divine hermaphrodite in the Spirit and Soul that is fused and perfect. The cornietely feminine Soul and the completely masculine Spirit are fused in initiation. An Angel is a divine hermaphrodite. No Angel is of intermediate sex. It is necessary to place ourselves upon the Path of the Revolution of Consciousness. This path departs from the laws of evolution and involution. Really this is the straight, narrow and difficult path, of which the Great Kabir Jesus spoke.

Indeed, we are not what we think we are. Your name might be Joseph or Mary, but your true reality is the Innermost that the Aztecs in their Theology call Quetzalcoatl, the Divine Twin. Observe in the inferior lower part of the Solar Stone the two fiery serpents, united by their tongues, one in front of the other. In chapter seven we stated that the xiuhcoatl are the eternal pairs of opposites; to this we must add that they are the symbol of the Innermost in the man and in the woman. The Innermost has two souls and a septuplet body in each one of its poles of manifestation, masculine and feminine, which were given unto him by Jehovah God when he was expelled out from Eden. The Master Paul of Tarsus states: "But I see another law in my members, warring against the law of my Spirit, and bringing me into captivity to the law of sin which is in my members." Romans 7:23

Indeed, only by means of the intimate esoteric aspiration directed towards the whole, towards the inevitable, towards the insuperable, can men and women who adore each other become complete, integral, unitotal.

Parsifal Unveiled, *1970*

It is written with golden words in the great book of cosmic existence that only in that masculine-feminine plenitude can the opposite sexes find the reciprocal perfect equilibrium.

A PRACTICE

The best asana (sacred posture) for the Maithuna is the normal one breast against breast, face-to-face, solar plexus against solar plexus in order to form a perfect androgyny; later, the man and woman withdraw from the sexual act before orgasm and seminal ejaculation. Pseudo-esoteric and pseudo-occult reactionaries suppose they can awaken Kundalini by means of brahmacharya or forced celibacy. All initiates of authentic mystery schools know, through direct experience, that it is impossible to achieve the awakening and development of the seven grades of the power of fire without Tantric practices. There are two types of brahmacharya (sexual abstention) solar and lunar. Solar Brahmacharya is obligatory for all those who have already been born in the superior worlds with solar bodies, that is, for those who have left the Ninth Sphere.

About this booklet. Corrected October 2026. Earlier versions of this booklet gave some of the Master's early passages on awakening the Kundalini without noting his later teaching that it awakens only through the couple. Notes now sit beneath those passages, and our own headings have been put right. With thanks to the reader who pointed it out.

How this was made. All fifty-two books were extracted (73,105 paragraphs, 2,157,671 words) and swept on his words for it: the law of polarities, polarity and the poles, positive and negative, masculine and feminine, solar and lunar, Ida and Pingala, magnetism, the two poles and the two sexes, the androgyne and duality. Every family but the law itself and Ida and Pingala was kept only where it stood beside a pole or a force, which dropped, among others, the Polar race, the thaw at the Earth's poles, 256 uses of *magnetic* with no pole in them, and the mind's dualism, which *The Law of the Pendulum* prints. Every paragraph next to a teaching one was offered too, and 22 paragraphs that begin a sentence the readers had already kept were added by hand. That returned **1,020 candidate paragraphs in 45 books.** Every candidate was read **twice, by independent readers** working from a written brief. The two passes agreed on whether to print 94.8% of the time and on the class 90.9%, and a third reader, who saw neither verdict, settled the 53 they did not. 434 were judged printable and **426 are printed here**, 55 of them found only by position. The rest are recorded with the reason each was set aside.

What was set aside. 208 were another subject: the chakras, the Kundalini's ascent with no two currents in it, astrology and medicine for themselves. 59 named a pole only in passing, 50 were the ordinary word, 43 the separation of the sexes told as the history of the races, 43 the mind's dualism, 41 the sexual work as technique with no poles in it, 16 stories told for themselves, 4 the three forces for their own sake, 4 headings and 3 a student's question without his answer. 57 more were judged and not printed.

Some of it he spoke. 19 passages come from the two *Fifth Gospel* volumes, across 9 named lectures, each cited by the name of the lecture with the place and the year where the volumes record them.

What was corrected, silently. Seventeen scanner misreadings are mended: words split in two (*separation*, *empty*, *combined*, *conception*, *conjunction*, *without*, *developed*, *because*, *withstand*, *internal*, *enslave*), *arid* for *and* three times, *bum* for *burn*, *a/l* for *all*, and *pales* for *poles*, which the same sentence in another book prints correctly. The line-end breaks of the *Fifth Gospel*'s two narrow columns are closed up against the corpus rather than by guess.

No sentence of his is cut in half. Each range was extended against the corpus until his sentence closed, a passage that turned out to be the second half of the one before it was absorbed into it, and 83 ranges run over more than one paragraph. Four sentences that lost their full stop in the scan were read and closed by hand.

5 paragraphs were cut for standing twice. Two are reprints (a sentence of the 1952 Christmas Message printed again in the collected Messages, and Genesis 1:27 quoted in two books), and three restate an earlier book in the same section with nothing added. The earlier book is kept each time. Where he says a thing again in other words, the repetition is his own and stands.

126 passages also stand in a finished work, and every one is marked where it stands. Most of them are in *The Laws of the Three and of the Seven*, *Whose Veil No Mortal Has Lifted*, *The Words He Uses* and *Elemental Magic*. The editor ruled that shared passages print here too. An overlap is allowed wherever the teaching needs it. What is not allowed is an overlap a reader cannot see.

Checked five ways. Every reader's note was proved to sit on the passage as it is actually printed. Every printed pair was compared as sequences, and the restatements that survived were read against both sources by eye. Every ragged edge was repaired or named. Every one of the 28 passages marked a practice was proved to carry its own instruction or was read for it by eye. And no passage stands on this page in the wrong language.

A work of The Laws, the family for the laws he says govern everything, the sleeping man included: recurrence, return, karma, the pendulum, evolution and involution, the three and the seven, entropy, and now the two poles. It wears the family's sage ground and thick-and-thin border, in folium, the medieval violet that turns red or blue.
