The Level of Being

Why the outer reflects the inner: what our level of being governs, and why we cannot rise without first understanding where we stand.

THE LEVEL OF BEING

THE BEING

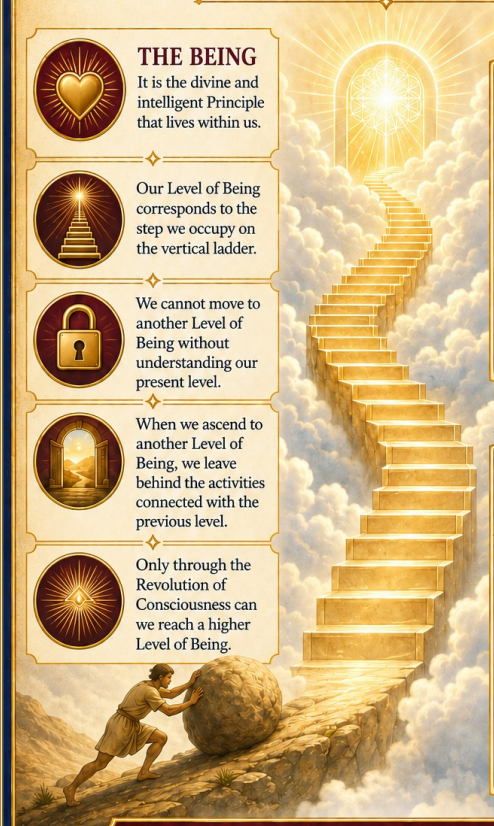

It is the divine and intelligent Principle that lives within us.

Our Level of Being corresponds to the step we occupy on the vertical ladder.

We cannot move to another Level of Being without understanding our present level.

When we ascend to another Level of Being, we leave behind the activities connected with the previous level.

Only through the Revolution of Consciousness can we reach a higher Level of Being.

KEY

By observing our surroundings, situations, friendships, problems, and reactions, we can discover which egos exist within us.

The outer reflects the inner.

OUR LEVEL OF BEING INFLUENCES:

- our level of consciousness
- the defects that characterize us most
- our habits
- our affinities
- the places we frequent
- our way of reacting
- the events we experience

PRACTICE: CONCENTRATION
